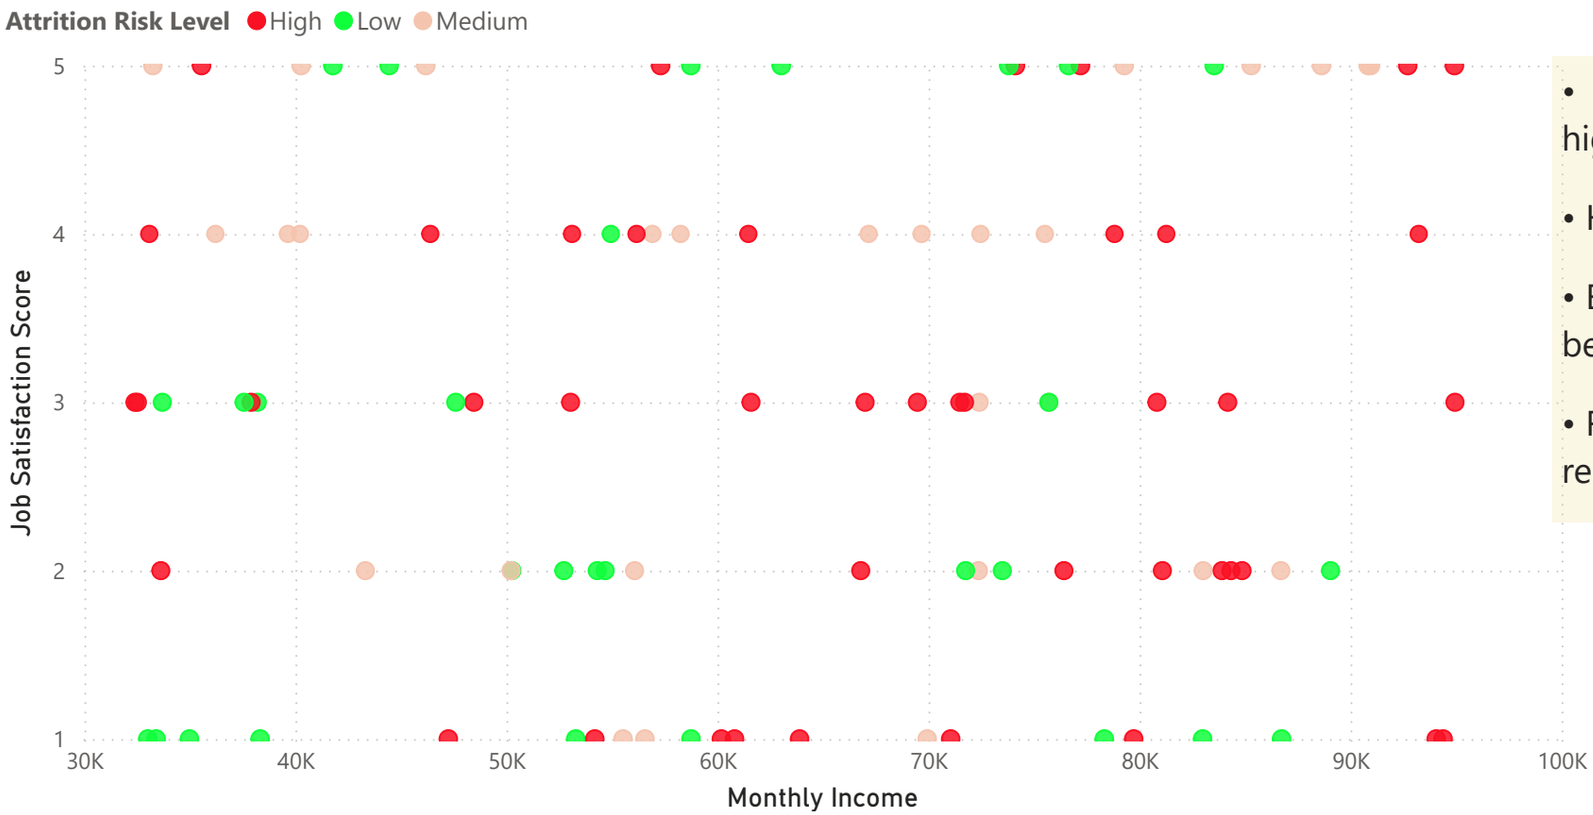
Workforce Retention Risk Map



- Low job satisfaction strongly correlates with higher attrition risk.
- High salary does not fully protect against exits.
- Employees earning ₹30K–₹55K with satisfaction below 3 form the most vulnerable group.
- Retention risk exists across all salary levels, requiring segmented HR strategy.

Department wise Parameters

Department	Employee Count	Attrition Count	Attrition Rate	Average Income
Finance	17	4	24%	60,788.00
HR	14	3	21%	59,172.29
IT	22	10	45%	72,733.50
Marketing	16	6	38%	59,766.81
Operations	16	11	69%	61,531.75
Sales	15	14	93%	62,862.07

- Sales shows critical attrition risk at 93%, requiring urgent intervention.
- Operations also faces severe workforce instability at 69%.
- IT has the highest pay levels, yet attrition remains elevated.
- Finance and HR are the most stable departments.
- Compensation alone does not guarantee retention.
